MEMORIAL DAY

The nation will pay deepest reverence tomorrow to its departed heroes of three wars. This is a day that we kneel in silent prayer dedicated to the memory of our loved ones who have gone before. The solemnity of the occasion should be generally observed. Appropriate services have been planned for Tonopah and the exercises will take place at 10 o'clock in the morning in the Butler theatre under the auspices of the G. A. R. and Woman's Relief Corps, with members of the American Legion and Spanish-American War attending in a body. Later the procession will proceed to the local cemetery where the graves of our loved ones will be strewn with floral remembrances.

No prettier or touching sentiment could be expressed than the few lines, entitled: "On Flanders Fields" by Henry Wadsworth Longfellow, which follows:
On Flanders Fields the sun beams bright,
The silver moon looks down at night,
And clustered stars from heaven shine.
Upon the long-drawn battle line,
From darkness to eternal light!

The little mounds and crosses white,
From lowly vale to mountain height,
Have marked this place a holy shrine.
On Flanders Fields!
The pulseless here they wait the right,
In that great battle for the right,
And now their souls in peace recline.
And rest in that Great Heavenly Mine,
While certain falls without attrition,
On Flanders Fields!

WINGFIELD TO EXPLOIT NEW CAMP OF TAYLOR

The advent of George Wingfield into Camp Taylor, the new sensational mineral district of Nye county, situated 50 miles south and east of Tonopah, augurs well for the industry. It means that Camp Taylor will quickly be proven regarding its richness, and it also means that there is every probability that a new mining camp is to have a rapid growth and that it will be endowed with great permanency.

The fact that eminent engineers have made an examination of the Storm Cloud property and reported favorably upon the mineral holdings, and the further fact that George Wingfield is to become a dominant factor in the development of the new district, will stimulate matters in no uncertain way, bringing about a real mining boom that will proceed to make a big noise that will be heard throughout the mining world.

Mr. Wingfield has refrained from sponsoring any new camps during the past two years, simply because he has not met up with any district that seemed to stand the acid test. Therefore, when he decided to become one of the builders of Camp Taylor he must have known his ground and his surroundings, and it's dollars to doughnuts that the new camp will experience a rapid growth.

The sensational silver and gold discoveries that have been made in the new district has resulted in the country being staked by prospectors and mining men generally. A spirit of optimism has prevailed for some little time, and new finds will be reported with frequency, no doubt, from this time forward.

Democrats say that if the republicans pass the tariff bill the party will be overthrown. Let's take a shot at it anyhow.

LINCOLN MEMORIAL TO BE DEDICATED

Tomorrow the Lincoln Memorial at Washington will be formally dedicated. This beautiful white marble structure is said to be at once the most unique as well as the most beautiful piece of architecture in the world. There is no wood or iron or other metal in the building. The entire structure is of marble. The building from the top of the foundation to the roof is 102 feet. The interior of the building is 146 feet long and 64 feet wide. This includes the space occupied by the colonnades which surround all four walls of the structure. There are 36 columns forming this colonnade, which is symbolic of the Union at that time.

The columns forming the colonnade are of white marble, as is the building. This marble was quarried from the top of the Rocky mountains not far from Denver. The steps and platform are made of Milford granite from Massachusetts. The interior floor and wall base are constructed of Tennessee marble. The roof is made of marble slabs three by five feet and three-eighths of an inch in thickness. Before they were placed these slabs were boiled in white wax. This has made them translucent so that they take the place of skylights. The structure is erected upon a solid concrete foundation which extends over 100 feet through the superoil to far below the surface of bed rock and is so firmly imbedded in the rock that even though all the land around this magnificent structure were washed away it would stand immovable. It required more than a year to build the foundation.

Work on the memorial has been constantly under way since February 12, 1914. On that day, Lincoln's birthday anniversary, William H. Taft, as chairman of the Lincoln Memorial commission, dug the first shovelful of earth that marked the beginning of the work which is now about completed. The total cost of this memorial is over \$3,000,000, all of which was appropriated by the congress. The building has been accorded the rank of one of the world's most wonderful structures because of its grandeur and simplicity.

The interior of the building is as beautiful in its simplicity as the exterior. It contains two marble tablets. Upon one is carved Lincoln's Gettysburg address; upon the other his famous second inaugural address. It contains two paintings, one at each end of the building. They are 12 feet high and 60 feet in length. They typify the life work of the immortal President. One is entitled "Emancipation," and the other "Reunion." These are the work of the famous American artist, Jules Guerin. It took him three years to paint the pictures. The only other decorative feature inside the building is the colossal statue of Lincoln, the work of America's noted sculptor, Daniel Chester French. The statue represents Lincoln sitting in a chair, and even in this position the statue is 22 feet in height. It is carved from Georgia marble and weighs 175 tons. It required two years of work from the time the marble was quarried until the statue was completed.

During the week of May 6th the war finance corporation made 139 loans, aggregating \$3,550,000.

TAX-EXEMPT BONDS ROB TAX-ROLLS

In commenting on the iniquity of the tax-exempt bond and its robbery of the government and common citizen, Robert S. Lovett, chairman of the board of directors of the Union Pacific system, says:

"The processes of common sense seem to be reversed in our basis of taxation. Instead of a premium on enterprise and industry by a lower tax on earned than invested income, just the opposite is the law. A salary or a profit made by personal effort is taxed the maximum rate under the provision for surtaxes, while capital escapes the tax altogether by being invested in municipal securities. The result is not only a sense of injustice suffered and discouragement in the individual relying upon his own efforts, but an orgy of recklessness and extravagance in municipal expenditures unparalleled in history."

"These huge sums are not only going into tax-exempt securities, shifting the burden of taxation to industry, but are being withdrawn from investment in industrial enterprises of all sorts that employ labor, and in the building of homes for housing the people."

"But that it is not all—not by half. Tax-exempt bond issues by village, town, city, county and state, with other extravagances which attend wasteful habits, are increasing state and municipal taxation to an extent that is truly alarming."
